

NexaGel[®] - High Performance Hydrogel for High Performing 3D Cell Cultures

Simple, Ready-to-Use, and Xeno-free

NexaGel[®] hydrogels are ready-to-use, featuring optimized multi-functional ligands and concentration formulations to support a wide range of cell types. They are ideal for various applications, including 3D cell models, stem cell spheroids, and organoids. These hydrogels are favored by users seeking simplicity and functionality, as each one is ready to mix directly with cell suspension without any additional adjustments.

- **Xeno-free:** 100% animal origin-free
- **Ready-to-use formulation:** No activation or adjustments required
- **Easy and fast cell harvesting:** Recover cells in just 20 minutes
